THE 8-DIGIT BIN EXPANSION IS COMING APRIL 2022

(ISO) expanded the length of Issuer Identification Numbers (IIN) referred to as Bank Identification Numbers (BIN) in the Visa system from 6 to 8 digits. Visa is supporting this change to fuel innovation of the payment ecosystem. Although the BIN length is changing from the first 6 to the first 8 digits of Visa Primary Account Numbers (PAN), PAN lengths and 9-digit account range lengths will not be modified.

To address the industry shortage in supply, in 2016 the International Organization for Standardization

Also effective April 2022, Acquiring BINs will be reclassified as Acquiring IDs, although the values will not change.

announced April 22, 2022 as its final effective date. Visa is supporting this change to ensure an adequate BIN supply to help fuel future innovation.

Visa endorsed the

standard in 2017 and

requests, for the foreseeable future, 6-digit BINs will continue to exist. Therefore, it is imperative that

Did you know?

acquirers are able to handle both 6- and 8-digit BINs in back-end systems and transaction processing.

Although ISO is only assigning 8-digit BINs for new

to 8-digit BINs will allow issuers the ability to support innovation and growth strategies by having a sufficient supply of BINs and to optimize growth costs.

Why does it matter?

Making the systems and process updates necessary to support 8-digit BINs can be a large effort and the repercussions of not having support in place by April 2022 can be significant. If you haven't started a project to make this important change, we highly recommend you start sooner than later.

Starting April 2022, Visa will only assign 8-digit BINs; 6-digit BINs will no longer be assigned. Migrating

To minimize cardholder impacts, PANs and tokens will not be modified. However, if

across the payments ecosystem there may be significant impacts to cardholder transaction processing. What do service providers need to do?

updates are not made to support 8-digit BINs

collaboration across all customer and stakeholder groups is essential, as this is not just a technology project and **requires cross-functional attention.**

This is a significant change that will touch businesses globally, so it's imperative that service providers assess the impacts of this change with clients, merchants, vendors and other partners and suppliers who support transaction processing, routing and downstream activities. **Partner readiness is critical to success** and

Service providers who make necessary changes early will be well positioned to support client needs as more issuers start adopting

8-digit BINs for their Visa portfolios.

NOTE: It is important to evaluate any potential cardholder impacts related to the industry wide migration to 8-digit BINs with cross functional teams at your organization. For more information on how to assess program readiness, contact your Visa account representative or visit the second contact and the program of the program

This is a significant change that

will touch businesses globally.

Allowing adequate time for communication and planning with clients, merchants, vendors and other partners and suppliers is a key planning consideration. If the new 8-digit BIN standard is not supported by the deadline, transaction processes may be impacted, and services provided to clients may be disrupted.

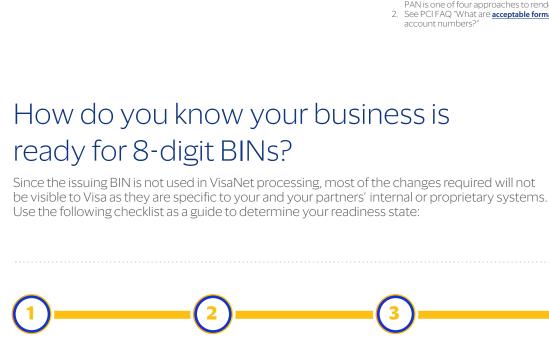

may experience a number of impacts in back-end systems including transaction processing, issuing product management, cardholder servicing, ATM, merchant servicing and disputes, fraud management, data warehouse

and reporting and other areas.

when stored". For merchants that do use the first 6 or 8 digits of the PAN for services, Visa has updated our truncation¹ requirement to allow for the removal of at least 4 digits, allowing a maximum of first 8 digits, and any other 4 digits to be stored.2
